**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3,5-7,9-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Okada et al (5809454).

As per claims 1,9, Okada et al (5809454) teaches an arrangement for reproducing a multimedia signal comprises presenting means for presenting the multimedia signal to a user, wherein the arrangement station (Fig. 1,6;col. 1 lines 5-28) comprises delay determining means for determining a delay measure representing the arrival delay of packets carrying the multimedia signal (as determining the time differential between data arrival and playback mode (col. 6 lines 35-55), as a delay (col. 11 lines 25-50), based on the differential bit rate (col. 6 lines 50-55)); and the presenting means comprises control means having comparison means for determining a difference signal representing a difference between the delay measure and a reference value (as counting the difference between the write signal pulses and the read signal pulses -- col. 7 lines 21-31); and in that the presentation means comprises adjusting means for adjusting the presenting speed

in dependence on the difference signal (as adjusting the sound interval for compression/expanding according to the write process -- col. 7 lines 34-50).

As per claims 2,10, Okada et al (5809454) teaches varying the presentation speed of the sound without changing the intonation of the audio signal (abstract).

As per claims 3,11, Okada et al (5809454) teaches varying the duration of the segments based on the delay measure (col. 11 lines 35-49; col. 9 lines 1-66)

As per claims 5,17, Okada et al (5809454) teaches adapting the reference value in dependence on the variations of the difference value (col. 9 lines 45 – col. 10 line15).

As per claims 6,7,12,13, Okada et al (5809454) teaches adjusting the movement speed of the object video signal (col. 14 line 30 – col. 15 line 65; col. 18 lines 10-65)

#### ***Response to Arguments***

3. Applicant's arguments with respect to claims 1-3,5-7,9-17 have been considered but are moot in view of the new ground(s) of rejection.
